

# 5 THINGS YOU DIDN'T KNOW YOU COULD DO ON INSTAGRAM

## DOUBLE TAP ANY PHOTO TO LIKE IT

Short and sweet, and a way to give your thumbs a well-deserved break.

## GET POST NOTIFICATIONS FROM PEOPLE YOU FOLLOW

Have a certain Instagrammer you don't want to miss? Click the three dots in the upper right hand corner of somebody's profile, then click "Turn on Post Notifications."

## SEE EVERY POST YOU'VE EVER LIKED

Did you suddenly remember an awesome recipe you've been meaning to try? Click on "Options," and then "Posts You've Liked." **Happy scrolling!**

## USE LESS DATA

We all love photos and videos, but since Instagram is made up entirely of those things, it can be a data suck. Click your profile, and then "Options," and select, "Cellular Data Use."

## EDIT WITH MORE THAN JUST FILTERS

Crop, saturate, rotate, brighten, darken... You're not limited to only the filters Instagram gives you, and you can find a full suite of editing tools by clicking "Edit" next to the filter option when you select a photo to post.
